

MAKE YOUR OWN:

fabulous flower wheels

The wild enthusiasm and raptures that greeted this craft came as something of a surprise to me, which just confirms my belief that no matter how well you think you know them, your kids will always take you by surprise! Due to their popularity we ended up making these flower wheels until there was not a scrap of crepe paper left in the house.

The under three's will enjoy sticking the crepe paper on anywhere. Older children will get a kick out of custom designing and then creating their own flower wheel.

YOU WILL NEED:

- paper plates
- white glue
- scissors
- different colours of crepe paper
- pen or marker

DIRECTIONS:

- 1 Cut crepe paper into pieces. We used pieces that were roughly two by two inches but there is no need to be precise.
- 2 Draw a simple geometric design onto a paper plate.
- 3 Pour some white glue onto a spare paper plate. Then scrunch up a piece of crepe paper, dip it in the glue and stick to the plate.
- 4 Continue with different colours until you have created a fabulous flower wheel.
